DETAILED ACTION

Drawings

1. The drawings are objected to because all elements of each drawing are suggested to be labeled (for example, see front page of WO 98/47240, also assigned to the present inventor). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Objections

2. Claims 7-12 are objected to because of the following informalities:

Art Unit: 2634

a. In claim 7, the phrase "which estimate is weighted by said time statistic" is suggested to be changed to "in which the estimate (X_p) is weighted by said time statistic"

b. In claim 9, the phrase "the instantaneous impulse response" is suggested to be changed to "an instantaneous impulse response".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 13 and 14 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to define each variable of in each equation. The variable **I** is not defined in the claims.

Allowable Subject Matter

5. Claims 1-12 are allowable over prior art references (if above objections are overcome) because related references do not disclose estimating an impulse response of a plurality of channels, and correcting the impulse response by weighting the impulse response by a space statistic and an estimate of additive noise.

Art Unit: 2634
